

The Management of HARDLEVEL - ENERGIAS RENOVÁVEIS, LDA is aware of the commitment made to its customers in the Trading of Used Oils. In this way, it established in its organization an Environmental Quality and Management System based on the UNE-EN-ISO 9001: 2008 standards; UNE-EN-ISO 14001: 2004 and ISCC-EU. The policy in question is open to the public and provides a framework for establishing and reviewing the following objectives:

- Ensure that the services provided are sustainable, reliable and comply with applicable laws, specifications, standards, codes and conduits;
- Establish training programs that fit the company's work and enable the development of the qualification of its employees;
- Maintain permanent contact with customers and suppliers, with the aim of increasing collaboration and continuous improvement of products and services from the point of view of Quality and Environment;
- Include and motivate the employees of the company and, where appropriate, those who work on behalf of Hardlevel, with the aim of encouraging their participation in the management and development of the implemented Quality and Environmental Management System;
- Comply with the legal requirements applied to all existing activities as well as to the appearance of new services or changes that are made, as well as to other requirements that subscribe;
- Adopt measures of continuous improvement in the effectiveness of the System and Prevention of Environmental Impacts and Deviations of Quality and Environment, always depending on the real possibilities of the company;
